

TWO SOLUTIONS FOR THE PERFECT REPLACEMENT

We have two versions of bearings for the replacement of SAF trailers.

The OES version is ideal for workshops and fleets access to proper tools seeking a more cost-effective solution.

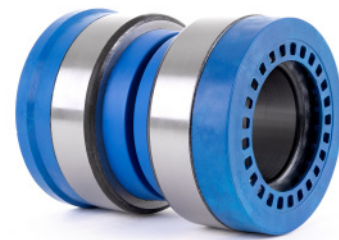

We also have the version patented by Fersa. Our bearings are pre-greased, readjusted and come with the tools adapted to the part to facilitate and speed up the replacement.

Both versions have all the necessary components for the replacement: seals, inner ring union and grease.

OES Version

- Cost competitive.
- Ideal for workshops with access to proper assembly tools.

Version patented by Fersa

- Pre-greased.
- Includes mounting tools.
- Quick assembly.
